polynucleotides can be used for modulating lighin content, lighin composition and the structure of a plant, especially eucalyptus and pine species, and for modifying the activity of an enzyme involved in lighin biosynthetic pathway, and for producing a plant having altered lighin content, composition and structure. They can be used for designing probes and primers useful for detecting similar DNA and RNA sequences in any
                                                                                                                                                                                                                                                                                                                                                                                                    The present invention describes isolated polynucleotides and proteins encoding and representing the enzymes cinnamate 4-hydroxylase (C4H), coumarate 3-hydroxylase (C3H), phenolase (PNL), O-methyl transferase (OMT), cinnamyl alcohol dehydrogenase (CAD), cinnamyl-CoA reductase (CCR), phenylalanine ammonia-lyase (PAL), 4-coumarate:CoA ligase (4CL), coniferol glucosyl transferase (CGT), coniferin beta-glucosidase (CBG),
                                                                organism and for PCR amplification. The limin content can be efficiently modified using the polynucleotides. AAAb7908 to AAAb8201 and AAB16341 to AAB16449 represent polynucleotide and protein sequences used in the
                                                                                                                                                                                                                                                                                coumerate CoA ligase, cytochrome P450 LXXIA, diphenol oxidase, flavanol glucosyl transferase, flavenoid hydroxylase, and isoflavone reductase, which are involved in the lignin biosynthetic pathway. The

```
hybridisation probes to screen libraries from the desired plant. Short segments of (I) or its fragment are useful in amplification protocols to amplify longer nucleic acids or its fragments encoding homologous genes from DNA or RNA. (I) or its fragments are useful as molecular genetic markers for quantitative trait loci (QTL) tagging, QTL mapping, DNA fingerprinting, and in marker assisted selection, particularly in ryegrass and fescues, and in forage and turf grass improvement, e.g. tagging QTLs for herbage quality traits, dry matter digestibility,
                                                                                                                                                                                                                                                                                                                                                      ryegrass (Lolium perenne) or fescue species. (1), its nucleotide sequence information and/or single nucleotide polymorphisms is useful as a molecular genetic marker. (1) can be used for modifying lignin biosynthesis and/or cellulose degradation in a plant to manipulate cell walls. (1) or its fragments are useful for isolating cDNAs and genes
                                                                                           mechanical stress tolerance, disease resistance, insect pest resistance, plant stature, leaf and stem colour. The present sequence represents a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           The present invention describes a nucleic acid (1) or its fragment encoding caffeoyl-CoA 3-O-methyltransferase (CCOAMT), cinnamyl alcohol dehydrogenase (CAD), caffeic acid O-methyltransferase (OMT),
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Claim 11; Fig 62; 436pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Novel nucleic acid encoding lignification and cellulase enzymes or their related enzymes useful for modifying lignin biosynthesis and cellulose degradation in plants to manipulate plant cell wall
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   F5H; CELL; phenylalanine ammonia lyase; PAL; 4-coumarate:CoA ligase; 4CL; ryegrass; fescue species; molecular genetic marker; gene; ss.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     à PAL enzyme is useful for measuring the relative amount of PAL levels in a tissue. The polynuclectide sequences encoding PAL are useful in the preparation of plant expression constructs for modifying features of the response of a plant cell to wounding, damage or other injury from disease. Disruption or down-regulation of PAL activity can be used to reduce the browning response to wounding in vegetable crops. The present sequence represents lettuce LsPAL1 enzyme.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          (Lactuca sativa) phenylalanine ammonia-lyase (LsPAL) enzymes, and the polynucleotide sequences encoding them. The polynucleotide sequences encoding PAL are useful in the preparation of plant expression constructs for modifying leatures of the response of a plant cell to wounding, damage or other injury from disease. Disruption or down-regulation of PAL activity can be used to reduce the browning response to wounding in vegetable crops. The present sequence represents lettuce LsPAL2 enzyme.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Novel polynucleotide useful in preparing plant expression constructs to modify the response of a plant cell to wounding, damage or other injury from disease causing organisms or from plant pests \,\cdot\,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       biosynthetic pathway, and for producing a plant having altered lighth content, composition and structure. They can be used for designing probes and primers useful for detecting similar INA and KNA sequences in any organism and for PGR amplification. The lighth content can be elliciently modified using the polynucleotides. AAA57998 to AAA68201 and AAB16341 to AAB16449 represent polynucleotide and protein sequences used in the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             polynucleotides can be used for modulating lighin content, lighin composition and the structure of a plant, especially eucalyptus and pine species, and for modifying the activity of an enzyme involved in lighin
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          (CCR), phenylaianine ammunia iyase (PAi), 4 counmarate:COA ligase (4CL), confiferol glucosyl transferase (CGF), confiferin beta-glucosyldase (CBF), conference peroxidase (CBF), depha-amylase, larmase, peroxidase, ferulate-5 hydroxylase (FSH), alpha-amylase, caffeic acid methyl transferase, caffeoyl COA methyl transferase,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      The present invention describes isolated polynucieotides and proteins encoding and representing the enzymes cinnamate 4-hydroxylase (C4H), commarate 3-hydroxylase (C3H), phenolase (PNI), G-methyl transferase (OMT), cinnamyl alcohol dehydrogenase (CAD), cinnamy
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        pathway useful for producing transgenic plants especially eucalyptus and pine species having altered lighin content, composition and

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            to amplify longer nucleic acids or its iragments encoding homologous genes from DNA or RNA. (I) or its iragments are useful as molecular genetic markers for quantitative trait loci (QTL) tagging, QTL mapping, DNA fingerprinting, and in marker assisted selection, particularly in ryegrass and fescues, and in forage and turf grass improvement, e.g. tagging QTLs for horbaye quality traits, dry matter digestibility mechanical stress tolerance, disease resistance, insect pest resistance, plant stature, leaf and stem colour. The present sequence represents a plant stature, leaf and stem colour. The present sequence represents a
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      encoding caffeoyl-CoA 3-O-methyltransferase (CCOAMT), cinnamyl alcohol dehydrogenase (CAD), caffeic acid O-methyltransferase (OMT), cinnamate-4-hydroxylase (C4H), cinnamoyl-CoA reductase (CCR), peroxidase (PER), cellulase (CELL), ferulate-5-hydroxylase (F5H), phenylalanine ammonia lyase (PAL) or 4-coumarate:CoA ligase (4CL) from perennial ryese (PAL) or fescue species. (1), its nucleotide sequence information and/or single nucleotide polymorphisms is useful as a molecular genetic marker. (1) can be used for modifying ligning be accepted to the contract of the contract

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               cinnamoyl-CoA reductase; CCR, peroxidase, PER, ferulate:5 hydroxylase; F5H; CELL; phenylalanine ammonia lyase; PAL; 4-coumarate:CoA ligase; 4CL; ryegrass, fescue species; molecular genetic marker.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                encoding homologous proteins from the same or other plant species, as hybridisation probes to screen libraries from the desired plant. Short segments of (1) or its fragment are useful in amplification protocols
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Claim 30; Fig 63; 436pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Novel nucleic acid encoding lignification and cellulase enzymes or
their related enzymes useful for modifying lignin biosynthesis and

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Lolium perenne.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     30-JUL-2002 (first entry)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          The present invention describes a nucleic acid (1) or its fragment
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Colium perenne (perennial ryegrass) amino acid sequence from the present
